Allen Kang

Product Designer & Product Manager

allensmkang@gmail.com · mooque-dev.github.io · linkedin.com/in/mooque · Toronto, Canada

Senior product designer with product management experience: I stepped in as product manager to ship Pipelines, and on payments work I owned discovery, requirements, phased delivery and the metrics. Eight years in product design, the last five on transaction-heavy products: checkout and fee flows, split payments across three tax jurisdictions, and integrations between merged products. I lead through influence across engineering teams. I have directed product owners and business analysts on requirements, and I build and operate my own products, so APIs, deploys and incidents are familiar ground.

EXPERIENCE

Aplos (now Velora) · Senior Product Designer — Feb 2025 – Jun 2026

- Owned split transactions from discovery with 8 accountants to phased delivery inside a no-refactor constraint: one payment recorded as a donation, an in-kind gift and goods received, compliant across Canadian, US and Australian tax rules. In the first month, categorization tickets fell 70% and manual adjustments 60%, supporting $1.8M ARR in connected accounts.
- Paused a 75% to 82% fee opt-in win to fix a leak in the edit flow, then ran a four-variation A/B test in Pendo. The winner reached 92% with conversion and average gift steady, and shipped platform-wide.
- Defined integration requirements with engineers across Aplos, Keela and Raisely: data import and export, schema translation and editable data mapping for auditable financial records.
- Grew Orchid, the design system I pitched at Keela, into one library of 340+ components adopted by three engineering teams without direct authority. Ran the first joint reviews between the merged teams. Mentored two designers.

Keela · Lead Product Designer — Mar 2023 – Feb 2025

- Pitched Orchid to leadership with surveys from five departments and earned two dedicated front-end engineers.
- Led Pipelines and Reports & Dashboards, set up the launch process, and worked with product owners on requirements. Mentored one designer.

Keela · Product Designer & Associate PM — Feb 2021 – Mar 2023

- Stepped in as product manager to ship Pipelines, owning scope, requirements and release; recognized for autonomy and leadership.
- Framed Automation as a platform capability with the PM and CTO, then ran discovery with 15 operations managers and three rounds of prototype testing tracked in Linear: 30% adoption across 355 organizations, contributing to a 13% ARR increase.

Forkable · UX/UI Designer (Contract, part-time) — Jan 2020 – Sep 2022

- Made the case for a design system to leadership and moved the practice from Sketch to Figma; directed product owners and analysts on requirements, and worked roadmaps with the Director of Technology, PMs and GMs.

MyJourney · UX/UI Designer (Part-time) — Aug 2019 – Jul 2022

- Ran research and usability testing with patients and clinicians, directed requirements with product owners and analysts, and designed clinician dashboards for a cancer-care web and mobile app.

Earlier · Xperly, founding product designer; ROSSUL, junior UX/UI designer — 2018 – 2019

PRODUCTS I BUILD AND RUN

ARND · Founder, live-music discovery app — 2025 – Present

- Designed and built solo: data model, access rules and API on Postgres, web and iOS apps, in public beta at arnd.app. Run production: health checks, first-party crash reporting and incident response, including a September 2026 catalog outage that led to monitoring on three surfaces and honest error states.

Yuwol Productions · Internal tools for a Toronto musical company — Oct 2025 – Present

- Scheduling, a bilingual script reader and a bill splitter, used daily by a forty-person company, with weekly releases from direct feedback.

SKILLS

Discovery · Requirements and API definition with engineers · Roadmaps and stakeholder presentations · A/B testing and analytics (Pendo, Amplitude) · Agile delivery in Scrum teams (Jira, Linear) · Production support · React, TypeScript, Postgres · Figma, design systems

Languages: English and Korean; French, basic and improving

EDUCATION & CERTIFICATIONS

Bachelor of Design, Graphic Design · YSDN (York University & Sheridan College joint program), 2012 – 2017

Certifications: IDEO U From Ideas to Action · Google Cloud Generative AI Fundamentals, Responsible AI · Georgia Tech Python & Data Structures
