Allen Kang

Product Manager & Product Designer

allensmkang@gmail.com · mooque-dev.github.io/product · linkedin.com/in/mooque · Toronto, Canada

Product builder with eight years on B2B software, the last five on payments and finance for nonprofits in Canada, the US and Australia. I find the problem with the people doing the work, make the case with data, and take it through delivery with engineering. Automation went from discovery to a paid add-on used by 30% of 355 organizations; split payments cut categorization tickets 70%. I stepped in as PM to ship Pipelines, and I build and run my own products with AI coding tools.

EXPERIENCE

Aplos (now Velora) · Senior Product Designer — Feb 2025 – Jun 2026

- Owned split transactions end to end: discovery with 8 accountants, requirements, and a phased plan that shipped inside a no-refactor constraint across Canadian, US and Australian tax rules. First month: categorization tickets down 70%, manual adjustments down 60%, supporting $1.8M ARR in connected accounts.
- Spotted a leak behind a 75% to 82% fee opt-in win and made the case to pause the rollout; scoped four variations and ran the A/B test in Pendo. The winner reached 92% with conversion and average gift steady and shipped platform-wide.
- Defined integration requirements with engineers across Aplos, Keela and Raisely as three products merged: import and export, schema translation and editable data mapping for auditable financial records.
- Drove adoption of one shared design system (340+ components) across three engineering teams without direct authority; ran the first joint reviews between the merged teams and mentored two designers.

Keela · Lead Product Designer — Mar 2023 – Feb 2025

- Made the business case for a design system with surveys from five departments; leadership funded two dedicated front-end engineers.
- Led Pipelines and Reports & Dashboards with product owners and engineering, and set up the launch process the team shipped with. Mentored one designer.

Keela · Product Designer & Associate PM — Feb 2021 – Mar 2023

- Stepped in as product manager for about three months to ship Pipelines: owned the backlog, sprint planning, scope and release, and tracked the launch metric.
- Framed Automation as a platform capability with the PM and CTO, then ran discovery with 15 operations managers and three rounds of prototype testing: 30% adoption across 355 organizations, contributing to a 13% ARR increase.

Forkable · UX/UI Designer (Contract, part-time) — Jan 2020 – Sep 2022

- Worked roadmaps with the Director of Technology, PMs and GMs; directed product owners and analysts on requirements, and made the case for a design system.

MyJourney · UX/UI Designer (Part-time) — Aug 2019 – Jul 2022

- Ran research with patients and clinicians and directed requirements with product owners for a cancer-care web and mobile app.

Earlier · Xperly, founding product designer; ROSSUL, junior UX/UI designer — 2018 – 2019

PRODUCTS I BUILD AND RUN

ARND · Founder, live-music discovery app — 2025 – Present

- Took it from research with fans and performers to a public beta, prioritizing from interviews and usage data; built it solo with AI coding tools (161 merged pull requests). Run production myself, including a catalog outage that led to monitoring on three surfaces.

Forkestrate · Co-founder, AI recipe app — 2025 – Present

- Took it from zero to MVP in under three months with a PM and two engineers.

Yuwol Productions · Internal tools for a Toronto musical company — Oct 2025 – Present

- Scheduling, a bilingual script reader and a bill splitter, used daily by a forty-person company, with weekly releases from direct feedback.

SKILLS

Discovery and customer interviews · Prioritization, scope and roadmaps · Requirements with engineers · Experiments and metrics (Pendo, Amplitude) · Agile delivery (Jira, Linear) · Building with AI tools (Claude Code, Cursor) · React, TypeScript, Postgres · Figma

Languages: English and Korean; French, basic and improving

EDUCATION & CERTIFICATIONS

Bachelor of Design, Graphic Design · YSDN (York University & Sheridan College joint program), 2012 – 2017

Certifications: IDEO U From Ideas to Action · Google Cloud Generative AI Fundamentals, Responsible AI · Georgia Tech Python & Data Structures
